CHASSIS: Heavy duty & Robust chassis, fabricated from rolled channels and plates.

DRIVE UNIT AND TRANSMISSION: State-of-the-art, imported ZF Gear Box transmission comprises of the fully integrated helical gear train. It enables gradual loading and relieving of teeth, giving the effects of low noise, extremely high load-bearing capability and smooth running at high circumferential speeds.

ELECTRICAL SYSTEM: Control circuit consists of MOSFET Chopper Control. The controller is designed to provide smooth, silent and efficient speed control. An average output voltage is controlled by varying pulse width of MOSFET switching. Electronic controls for soft start and jerk free transmission provide the following advantages.

1. No wastage of battery power resulting in more work output.
2. Lower maintenance cost and downtime of equipment.

CONTROLS: Controls for forward / reverse motion, horn, light and emergency cut off & key switch are mounted on Instrument Panel. Accelerator & hydraulic brake are foot operated.

BRAKE: Drum & shoe type hydraulic service brake and parking brake are standard offering. Parking brake with micro adjustable lever and cable is externally mounted near the drivers' seat.

SUSPENSION: Rear suspension by leaf springs.

OPTIONAL EXTRAS: Power assisted Steering.
